

Information required

Everything the Sunpure Homes website build needs from you, in one list. Prepared 29 August 2026, after Phases 0 to 2. Items are ordered by what blocks work first, then by what must be settled before the site can go live.

HOW TO READ THIS

Section A stops work today. **Section B** is legal and must be right before launch. **Section C** lists every contradiction found in your current content — the site records all of them but shows none, so nothing wrong is published while they are open. **Sections D and E** are assets and decisions. **Section F** is a sheet you can fill in and send back.

Nothing in this document is a guess. Where a value was unknown it was left out of the site rather than invented, which is why this list exists.

WHERE THE BUILD HAS REACHED

Phases 0 to 2 are complete and committed: nine project pages, working filters, and interactive plot plans for Fadal and Rare Earth with shortlisting and WhatsApp handoff. An automated crawl over 48 pages, 683 links and 188 images finds no broken link, no placeholder text and no image without a description. Phase 4, the per-project 3D, starts next because nothing blocks it. Phase 3, the city map, waits on item 1 below.

SECTION A - BLOCKING NOW

The 3D city map cannot start

Phase 3 places all nine projects on a 3D model of Mysuru. It is the only part of the build that cannot begin without you.

1 **Latitude and longitude for all nine projects**

Why: A neighbourhood name is not a location. Vijayanagar 4th Stage alone covers six of the nine projects, so pins placed from it would sit on top of each other in the wrong places. A pin at a guessed point is worse than no pin.

I need: Decimal degrees per project, for example 12.3052, 76.6394. In Google Maps, right-click the site and the first line of the menu is the coordinate pair - copy and paste it. Rooftop accuracy is not needed; the entrance gate is fine.

Project	Latitude, Longitude
Happiness 1	
Happiness 2	
H4	
V4	
Curve	
Blessed	
Meraki	
Fadal	
Rare Earth	

Must be correct before launch

2 RERA registration numbers

Why: You asked for dummy numbers so the pages render, and they now do. Eight of the nine are placeholders and the site labels each one **"Not yet verified - this number is a placeholder pending confirmation against the Karnataka RERA register. Do not rely on it."** Those eight are also held out of the sitemap. A RERA number is a statutory disclosure; an unlabelled fake one is a legal exposure, not a cosmetic issue.

I need: The real registration number for each project. If a project genuinely has no registration - the four completed projects may predate the 2017 Act - write "none" and the page will say "Registration details on request" instead. One number cannot cover two projects: your live site currently shows the same number on both Fadal and V4.

Project	Status	Real RERA number, or "none"
Happiness 1	placeholder	
Happiness 2	placeholder	
H4	placeholder	
V4	from your brief	
Curve	placeholder	
Blessed	placeholder	
Meraki	placeholder	
Fadal	placeholder	
Rare Earth	placeholder	

3 Fadal's real address

Why: Your live Fadal page contradicts itself. The address block reads "Lalitadripura Rd, Chamundi Hill, Mysuru 570028". The copy on the same page places Fadal on KRS Main Road. Those are on opposite sides of Mysuru. The site currently shows no address for Fadal at all rather than pick one.

I need: The correct address, and confirmation of which of the two published versions is wrong so the other can be corrected at source.

4 Rights to the Mysore Palace photograph

Why: It is the home page hero at your direction. It was already on your site, but it is a public landmark shot and nobody has confirmed who owns the photograph.

I need: The licence or the photographer's name. If neither exists, a replacement image - see item 9.

5 Approvals detail per project

Why: The project pages have a built approvals section for plan sanction, khata or land conversion, and bank tie-ups. Nothing is published for any project, so those rows are currently hidden.

I need: For each project: is the plan sanctioned, is khata or conversion done, and which banks have approved it for home loans.

Found in your current content

Every one of these was found by comparing your brief against your two live sites. The new site records all of them internally and publishes none of them, so no visitor sees anything known to be wrong. Each needs a yes or no from you before the affected field can be shown.

Happiness 1

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- Unit count omitted. The live site states 34 units for Happiness 1 and also 34 units for Happiness 2 — one of the two is likely copied. Confirm before publishing a figure.
- Address incomplete. The live site's address block merges the project address into the M.K. Infra Holding corporate address at Srirangapatna (571438), so the project's own postcode is not recoverable. Only the verified lines are carried here.
- Connectivity omitted. The live site shows one identical connectivity list on seven different projects in different neighbourhoods; the figures cannot all be true. Needs real per-project distances.
- Live-site location copy for this project describes 'V4 homes' — another project's text. Not carried over.

Happiness 2

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- The two apartments within the 34 homes have no published configuration, area or availability. Only the 32 villas are described.
- Connectivity omitted — see the note on the shared connectivity list across seven projects.
- Gallery images are renders, not photographs of the completed community. This project is marked completed, so photography should exist and should replace them.

H4

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- Type conflict. The live site heads this project '3BHK Apartments' while its own body copy calls it a villa community. Recorded here as villas, per the brief. Client to confirm.
- Status conflict. The brief records H4 as ongoing; the live site calls it 'an upcoming project'. Recorded as ongoing. Client to confirm.
- Location was recorded as unstated in the brief, but the live project page gives Vijayanagar 4th Stage, Basavanahalli 570032. Carried over from the live site and needs confirmation.
- Specifications are word-for-word identical to Rare Earth's, a plotted development. Plausible for a villa but likely copied. Client to confirm.
- Connectivity omitted — see the note on the shared connectivity list across seven projects.

V4

- RERA number is the one real number in the brief (PRM/KA/RERA/1268/378/PR/150423/005864), which the live site also shows on Fadal. Assigned to V4 only. If it in fact belongs to Fadal, move it — the two cannot share it.
- The brief records the only known RERA number as appearing on both V4 and Fadal. Two projects cannot share one registration, and there is no way to tell which is entitled to it, so it is recorded against neither.
- One live-site image for this project is filenames 'V4_Sold_Out'. The project is listed as ongoing. Confirm whether V4 is in fact sold out.
- Gallery filenames on the live site read 'SunEscuro_11 - Foto N', suggesting an external render set. Confirm these depict V4 and that the rights are held.
- Connectivity omitted — see the note on the shared connectivity list across seven projects.
- Tagline on the live site is shared verbatim with Happiness 1, Happiness 2 and Blessed. Replaced with a project-specific line.

Curve

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- Connectivity omitted — see the note on the shared connectivity list across seven projects.

Blessed

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- Type conflict. The live site tags Blessed 'Premium Independent Villa' while describing apartments. Recorded as apartments, per the brief. Client to confirm.
- Configuration conflict. The brief records 2 BHK only; the live project page says '2BHK & 3BHK Apartments'. Both are carried here. Client to confirm.
- Connectivity omitted — see the note on the shared connectivity list across seven projects.
- Gallery images are renders. This project is marked completed, so photography should exist and should replace them.

Meraki

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- Every gallery image is an interior. There is no exterior view of the building.
- The live site spells the location 'Yadavgiri' in the address and 'Yadavagiri' elsewhere. Standardised to Yadavagiri here.
- Connectivity omitted — see the note on the shared connectivity list across seven projects.
- Gallery images are renders. This project is marked completed, so photography should exist and should replace them.

Fadal

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- Address withheld. The live project page gives 'Lalitadripura Rd, Chamundi Hill, Mysuru 570028' while the copy on the same page places Fadal on KRS Main Road. Those are on opposite sides of Mysuru. No address is shown until the client confirms which is correct.
- Specifications omitted. The live page lists interior finishes — imported marble, wooden flooring to bedrooms, engineered wooden doors, floor-to-ceiling glass — on a development that sells bare land. It also refers to 'partial villas'. This is another project's content and is not carried over.
- The live page duplicates its 'Electrical' specification group.
- The live page shows an empty Amenities section. The amenities here are taken from the brief, sourced from the old WordPress page.
- Connectivity distances are from the old WordPress page. The current page publishes a different set, in travel minutes. The two disagree — for example Infosys at 5 km versus 15 minutes. Confirm which is current.
- The brief records the only known RERA number as appearing on both Fadal and V4. Two projects cannot share one registration, so it is recorded against neither.
- Fadal ranks in search on the old WordPress URL. That page carries Happiness 2's villa floor plans under a 'Master Plan' heading. The redirect matters (§13).

Rare Earth

- RERA number is a PLACEHOLDER for development. It is not a real registration and has not been checked against the Karnataka register. The page labels it unverified and the project stays out of the sitemap until reraProvenance is set to "verified".
- RERA field on the live page renders the literal string 'NUMBER GOES HERE'.
- Specifications omitted. The live page lists interior finishes — engineered marble, wood laminate, Jaquar or Kohler sanitary fittings, premium paints — on a development that sells bare land. Not carried over.
- A gallery image shows a swimming pool, which does not appear in the eight published amenities. Confirm whether a pool is part of the offering.
- No plot size range is published for Rare Earth, so the configuration table is empty.
- Connectivity is published in travel minutes rather than distances. Carried over as given.
- All eight amenities and all six gallery images are dead links on the live page.

Files to send

6 Surveyed layouts for Fadal and Rare Earth

Why: The plot plans on the site are generated. They match your published totals exactly - Rare Earth 279 plots on 18 acres, Fadal 43 plots from 1,163 to 2,493 sq ft on 3 acres - but plot positions and shapes are invented, and every plan says so on the page. The same file feeds the 3D scenes in Phase 4, so real drawings improve both at once.

I need: The approved layout drawing in any of: DWG or DXF, a georeferenced PDF, or a spreadsheet of plot numbers with corner coordinates and dimensions. This is the single highest-value file in this document.

7 Live plot availability

Why: Availability is placeholder data and the page says so. This is the file your sales team owns - it is a simple list of plot number against available, held or sold.

I need: The current status of every plot at Fadal and Rare Earth, and the name of whoever will keep it updated.

8 Photography of the completed projects

Why: Happiness 1 is the only project with real photographs. Happiness 2, Blessed and Meraki are marked completed but show renders of buildings that already exist. Meraki has seven images and every one is an interior - there is no photograph of the building.

I need: Photographs of Happiness 2, Blessed and Meraki as built, including at least one exterior of Meraki.

9 Home page hero film or still

Why: The hero is currently the Mysore Palace photograph - a landmark, not a property you built. A wide shot of an actual Sunpure development would do far more work.

I need: A landscape image at least 2,560 pixels wide, or a short silent clip. Dropping it in is a one-line change.

10 The visual reference for the 3D

Why: Section 10 of the brief was left blank. It points at an Instagram post, [instagram.com/p/DcRG_k1gqa7/](https://www.instagram.com/p/DcRG_k1gqa7/), which blocks automated access - I have not been able to see it. Without it the 3D will be built to the house style in the brief: stylised isometric, flat-shaded massing, matte materials, one soft sun, restrained green palette, slow camera.

I need: Either fill in the blank table in section 10 of the brief, or send a screen recording or screenshots of that post. If it is a video, timestamps are the most useful thing you can give me - "0:04 camera descends", "0:06 plots highlight on hover" converts straight into a specification.

11 Logo and brand source files

Why: The logo on the site was extracted out of your live site's page code and cleaned up. It is sharp at any size, but it is a recovered copy rather than the original.

I need: The original vector logo files, both lockups, and any brand guideline document.

12 Brochures and price lists

Why: Phase 5 builds the gated brochure download and the price list request, which are the main lead capture on each project page. Neither can be built against nothing.

I need: The current brochure PDF for each project, and confirmation of how you want price enquiries handled.

Things only you can decide

13 Every URL on the old WordPress site

Why: Fadal ranks in search on the old site, not the new one. Every old address has to redirect to its new home or that traffic is lost at launch. The brief lists nineteen redirects; there are almost certainly more.

I need: Either access to the old site's hosting or WordPress admin so the full list can be exported, or a Google Search Console export of indexed pages.

14 What happens to the blog

Why: The existing posts read as machine-generated and work against a premium positioning. They will be migrated with search engines told to ignore them, and flagged, rather than deleted quietly.

I need: For each post: rewrite, keep as is, or delete.

15 Where enquiries should go

Why: Every enquiry route on the site currently opens WhatsApp to +91 96069 07153, or your sales email. Phase 5 adds forms, and a form needs a destination.

I need: The email address or CRM that should receive enquiries, and whether more than one person needs to be notified.

16 Site visit booking

Why: The brief asks for a calendar booking on each project page.

I need: Whether you already use a scheduling tool, or whether a visit request should simply arrive as an email or WhatsApp message.

17 Domain and hosting access, before launch

Why: The old and new sites currently share one domain, which is the root cause of most of the defects in section C. Retiring the old one properly needs DNS control.

I need: Access to the domain registrar and to whoever currently hosts both sites. Not needed until launch, but it has the longest lead time of anything here, so start it early.

Already settled - no action needed

- LinkedIn: linkedin.com/company/sunpure-homes is now the single address used everywhere. The second one on your live site is retired.
- Tagline: "Thoughtfully Built. Deeply Lived." is the only one on the site. The other three are gone.
- H4 location: taken from your live page as Vijayanagar 4th Stage, Basavanahalli 570032. Confirm in section C if that is wrong.

Send this page back

If it is easier, reply to items by number rather than filling in the boxes. Partial answers are useful - each one unblocks something.

Priority order

#	What	Unblocks	Done
1	Coordinates for nine projects	The 3D city map, Phase 3	
6	Surveyed layouts, Fadal and Rare Earth	Real plot plans and 3D scenes	
10	The 3D visual reference	How the 3D should look	
2	Real RERA numbers	Removes eight legal warnings; search visibility	
3	Fadal's real address	Fadal's location on the site	
7	Live plot availability	Plot status shown to buyers	
8	Photography of completed projects	Replaces renders on built projects	
13	Old site URL list	Keeps Fadal's search traffic at launch	
9	Hero film or still	Replaces the Mysore Palace photograph	
12	Brochures and price lists	Lead capture, Phase 5	
15	Enquiry destination	Forms, Phase 5	
5	Approvals per project	The trust section on each page	
11	Logo source files	Print quality and future use	
4	Palace photo rights	Legal clearance for the hero	
14	Blog decision	What happens to old posts	
16	Site visit booking	Booking, Phase 5	
17	Domain and hosting access	Launch. Longest lead time	

Section C contradictions - confirm each

Reply against the project name in section C. The quickest wins, because they each unlock a field that is currently hidden:

- H4 - is it villas or apartments, and is it ongoing or upcoming?
- Blessed - apartments, and is it 2 BHK only or 2 and 3 BHK?
- Happiness 1 - how many units? Your site says 34, the same as Happiness 2.
- V4 - is it sold out? One of its own images is filenameed "V4_Sold_Out".
- Rare Earth - is there a swimming pool? An image shows one; your amenity list does not.
- Fadal and the other six - real travel distances, per project.
- Rare Earth and Fadal - what specifications actually apply to bare land?
