

The new site, beside the current one

The current sunpurehomes.com and the new build, page for page.
Every figure below was measured on both sites in a browser, not estimated.

What a buyer can do	Current site	New site
Filter the project list	Controls present, none filter	Type, status and location, all working
Links that lead nowhere	14 on the Rare Earth page	0, site-wide
Images a screen reader can read	19 of 30 on Rare Earth	All of them
RERA registration on a project	Not shown	Shown on all nine
Explore the plots or floors	Not available	8 of 9 projects, in 2D and 3D

Measured 7 September 2026. The new site is complete for browsing; registration numbers and surveyed plot drawings are still to be supplied, and every page says so where that applies.

CHECKING ANY OF THIS YOURSELF

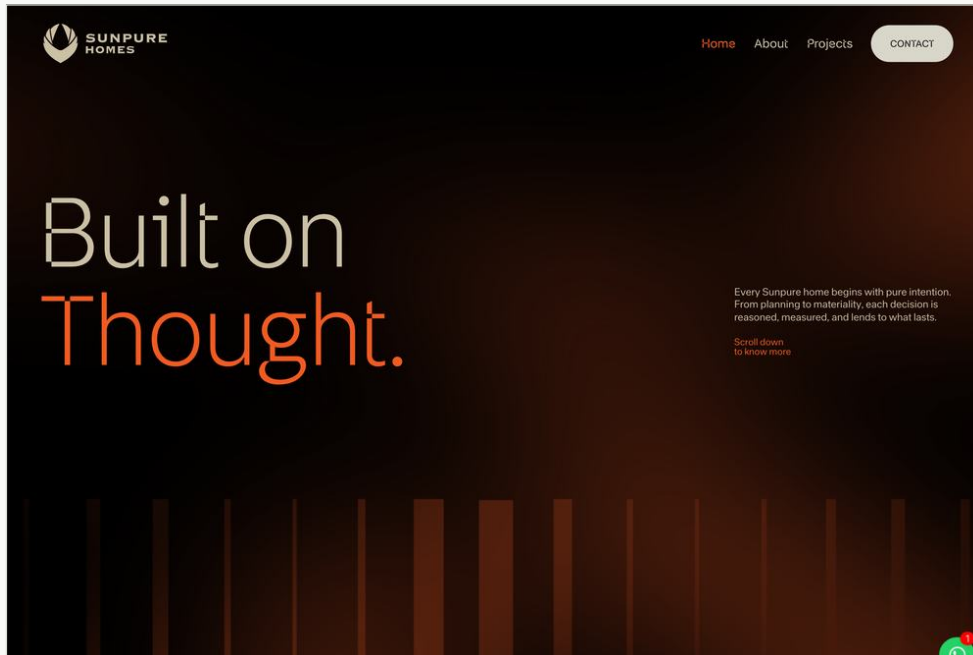

Open sunpurehomes.com/project and click Project Type, Status or Location. The list stays as it was.
Open sunpurehomes.com/project/rare-earth and click any of the eight amenities. Nothing happens.
The new site answers both, and a walkthrough can be arranged at any time.

PAGE ONE

The home page

The first thing a buyer sees.

CURRENT SITE

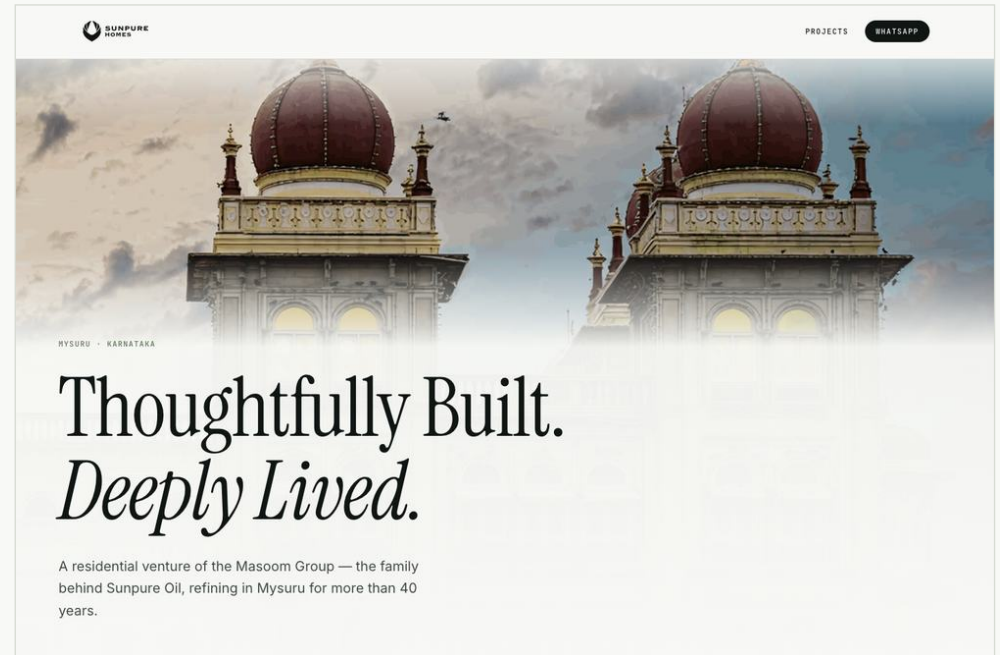

Headline reads "Built on Thought."

A second wording, "Thoughtfully Built. Deeply Lived.", appears elsewhere on the site.

A visitor learns who Sunpure Homes is inside one sentence.

NEW SITE

One line, used everywhere on the site.

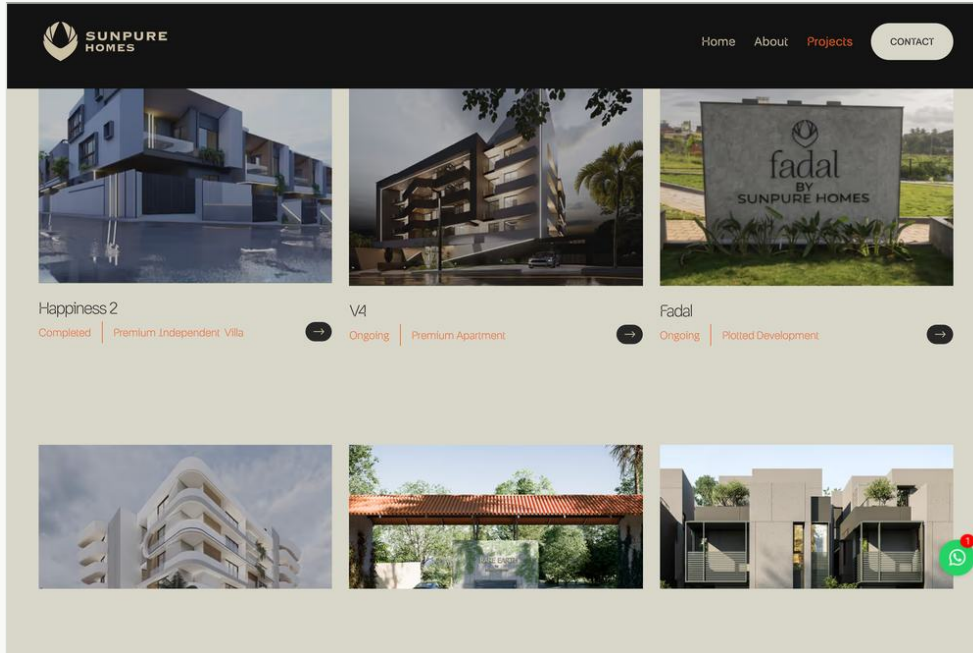

The Masoom Group and its forty years are named in the first sentence a visitor reads.

CHOOSING

Finding the right project

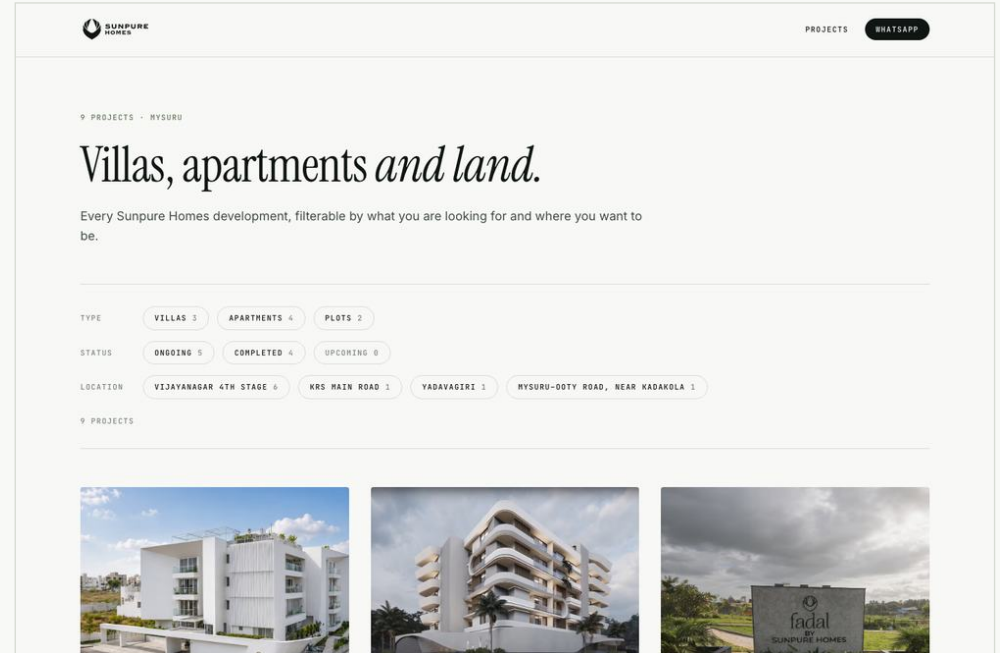

Nine projects, three product types, four neighbourhoods.

CURRENT SITE

Project Type, Status and Location controls are on the page. Selecting one does not change the list.

NEW SITE

The same three filters, each showing how many projects it holds, and each changing the results. A filtered view has its own address to share.

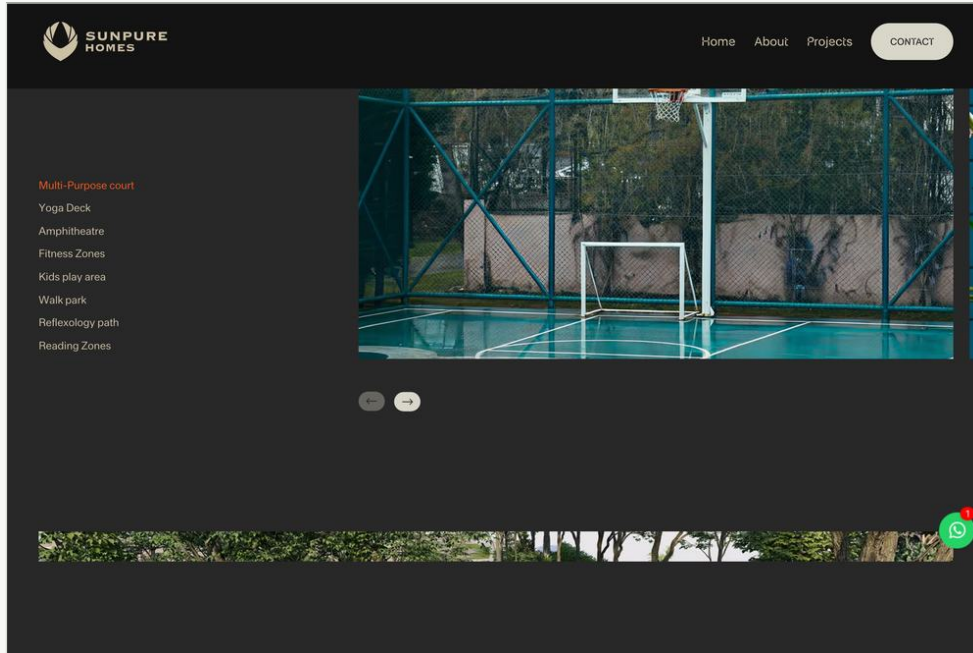

Nine projects narrow to the two that suit a buyer, and that view can be sent to the family.

INSIDE A PROJECT

The detail a buyer came for

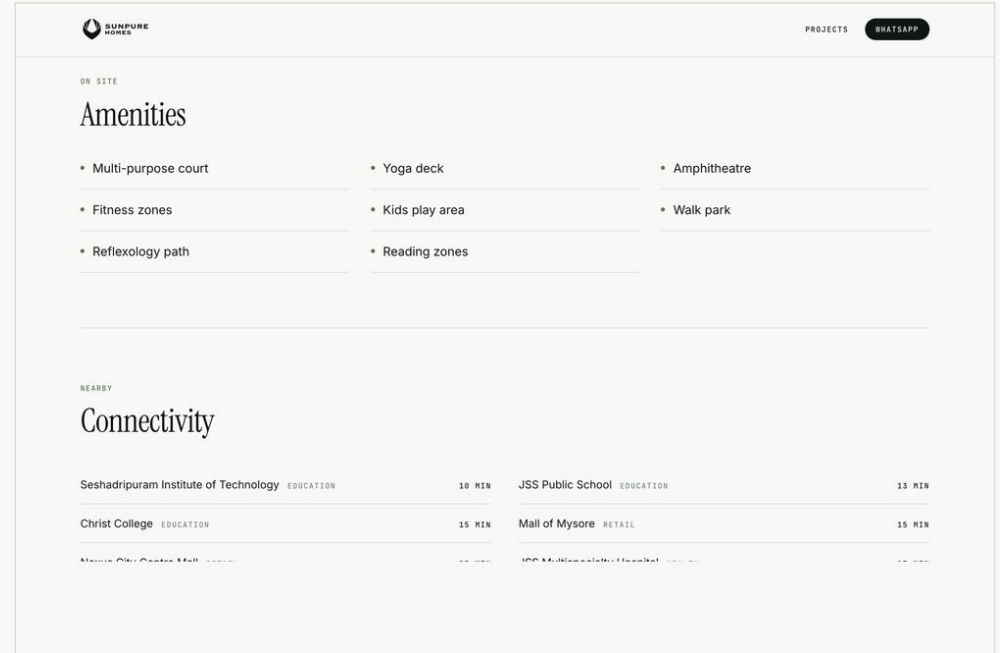

Rare Earth, on both sites.

CURRENT SITE

The eight amenities are links. Each one leads nowhere. The photograph beside them is stock.

NEW SITE

The same eight amenities, each placed on the site plan, with the project's own imagery.

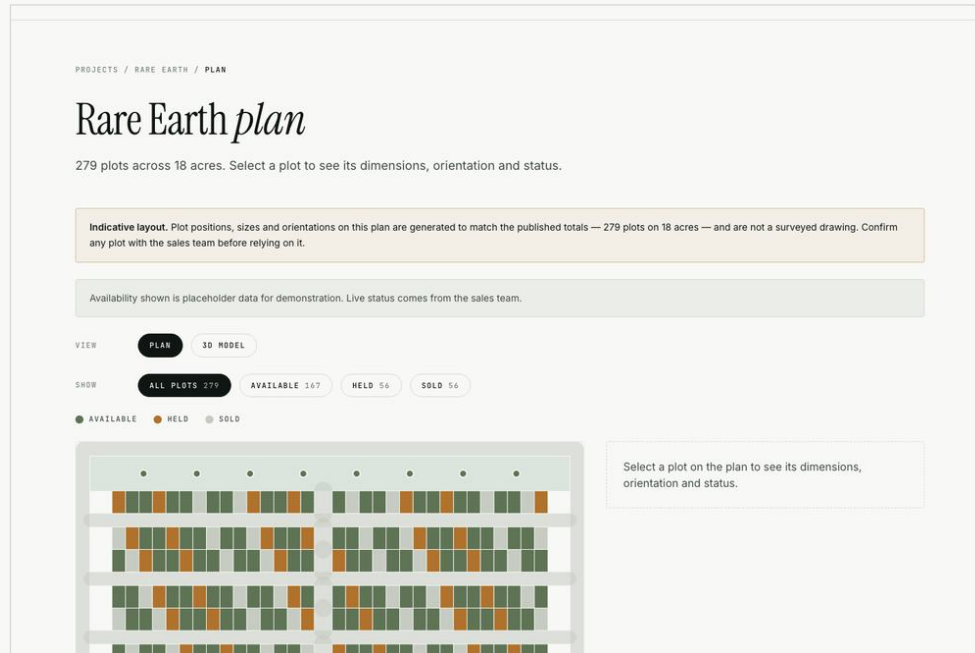

Every amenity leads somewhere, and the photography is of the project itself.

NEW

Two things the current site has no equivalent for

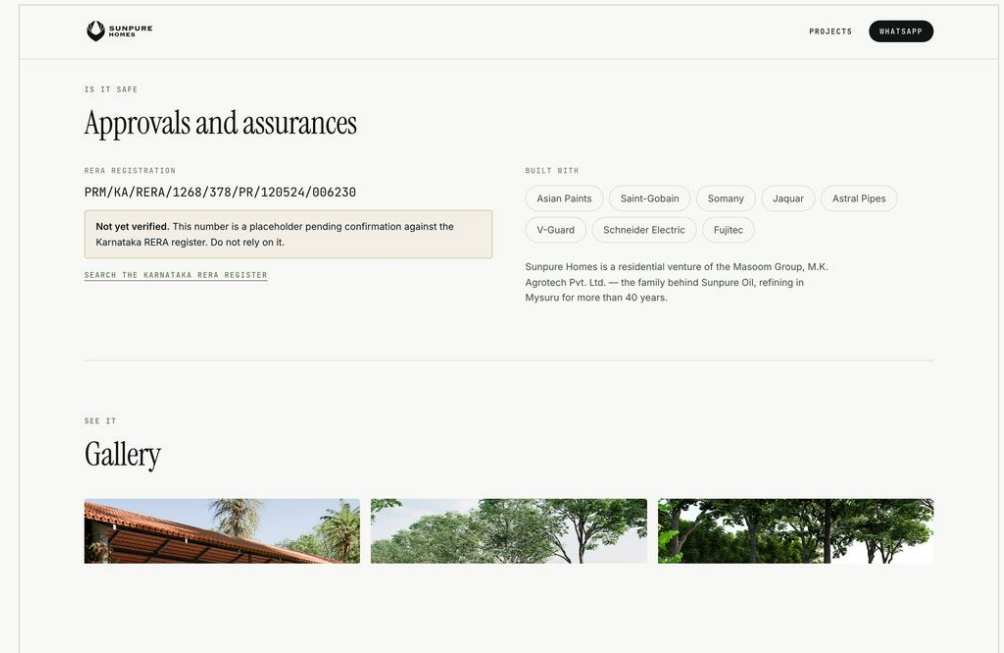

Both are built and working today.

CHOOSE A PLOT

Every plot and apartment is selectable, with its size, aspect and status, on a plan and in 3D. Layouts are indicative until the surveyed drawings arrive, and each plan says so on the page.

SEE THE PAPERWORK

Registration, the material partners and the Masoom Group connection sit on every project page rather than an About page. An unverified number is labelled as such.

A buyer can choose a specific plot and ask about it by number, on WhatsApp.
